

# SHAI GABRIEL BATONYA

FULL STACK DEVELOPER

054-7982775 | [shaibatonya@gmail.com](mailto:shaibatonya@gmail.com) | [LinkedIn](#) | [GitHub](#)

## PROFILE

### **Responsibility, Productivity, Ambition.**

I'm Shai, an experienced Full Stack developer specializing in **React, Node.js, MongoDB, AWS, Dockers & Kubernetes & CI/CD** procedures. With a proven track record in developing educational applications that improve learning processes through gamification. Ready for my next challenge in a company looking for an innovative and committed team player to deliver high-quality code.

## EXPERIENCE & PROJECTS

### **2023 - Present: Frontend Developer, StarQuest**

I'm developing the frontend infrastructure from scratch using **React, TypeScript**, and **NextJS**, designing intuitive and engaging user interfaces that power StarQuest's pioneering educational platform and managing the data on **MongoDB**. I collaborate closely with **UX** designers, deploying the **AWS** cloud platform and using **Docker & CI/CD** procedures.

- Launched a fully working version of the product, to improve the learning experience for users.
- Partnered with Ti-Space Career Accelerator to improve students success.

### **2022 - 2023: Full Stack Developer, EstateExplorer**

I developed a full stack platform for trading and selling properties worked with **React, HTML, CSS, JavaScript NodeJS**, and **Express** to create a robust backend infrastructure, and maintained the platform information on **MongoDB**.

- I created a user-friendly real estate asset management interface, focusing on a rich and involved user experience.

### **2019 - 2022 QC Engineer Gil Car, Champion Motors**

I performed quality assurance confirmation on vehicle control installations, oversaw operational efficiency, and utilized multimedia screen systems alongside testing software tools. I collaborated with the lab, defined access to the system settings, and conducted comprehensive checks before customer delivery.

- I reduced the work and testing time of the product by **20%**
- I decreased the average of customer complaints after product delivery by **10%**.

## EDUCATION

### **2023 - 2024 Full Stack Development Course, Yaniv Arad - Tech Training Labs**

Specialized in Full-Stack development using: **Redux, Firebase, MERN stack**, and **AI**.

### **2022 - 2023 Full-Stack Web Development student, TESI- ICCP**

During my studies, I gained experience through projects to bridge the theoretical and practical gaps and specialized in Full-Stack development using: **JavaScript, Node.js, React, HTML/CSS, MongoDB**, and **Express Generator**.

- I built a comprehensive event management platform encompassing event creation, editing, deletion, search filters, user logging, and website registration.
